

Are you a Veteran who has tinnitus? Does it bother you?

Would you like to join a study that could help improve services for tinnitus?

A team from the VA Portland Health Care System is conducting a study to better understand Veterans' experiences with tinnitus.

This study requires 1 hour of your time. You will watch some videos of Veterans talking about tinnitus. While you watch, you will give your opinions about the videos to an interviewer. Volunteers are **paid \$50** for participating in the interview. **This is a research study, not treatment. Please call 503-220-8262 ext. 51124 to talk to a study team member.**
